ZG Zero G App

There has been lot of research in the last 50 years on brain activity & physiological patterns of sleeping only to derive what sleep is and what it is not.

Sleep is the most mystical phenomena ever known to mankind; it was once considered a passive state, but studies have proven that sleep is a highly active process during which energy is restored, muscles are recovered and the day's events are processed.

It is also believed to have the key to elixir of youth.

Over the years technical innovations have help us understand the characteristics

of sleep phenomena, its patterns and how medications, diseases and our lifestyle have an impact on when and how we sleep. At Zero G, we have taken the first step in providing 'Healthy Sleep' by introducing the Conversion Kit. We are now extending this service further by launching a sleep app that will be first of its kind in the world to forecast health ailments and provide remedy by monitoring sleep pattern. Renowned Doctors, Dieticians, Physiotherapists, Fitness Trainers and eminent individuals from the Health & Wellness Industry will extended their support in making this application a success.
